Chemical Spill Response — Supervisor Observation Checklist

Kirkpatrick Level 3 (Behaviour) · on-the-job observation at 30 / 60 / 90 days

Technician: _____ **Observer:** _____ **Date:** _____

Site / SOP ref: _____

> Observe the technician responding to a planned spill scenario. Score each behaviour Yes or No. **Any critical step marked "No" = not yet competent** → schedule re-coaching. Mark the non-critical step too; it affects the compliance record.

#	Observable behaviour (follows the SOP)	Critical	Yes	No
1	Consulted the SDS / label before acting — did not touch or smell the spill	✔ Yes	☐	☐
2	Alerted others and cleared the area before any cleanup	✔ Yes	☐	☐
3	Donned the correct PPE (gloves, goggles, apron) before approaching	✔ Yes	☐	☐
4	Contained the spill with absorbent, working outside in, away from drains	✔ Yes	☐	☐
5	Selected the correct spill kit for the chemical (dry kit for water-reactive)	✔ Yes	☐	☐
6	Disposed of waste in the labelled hazardous-waste container	✔ Yes	☐	☐
7	Completed the incident log and notified the supervisor	Important	☐	☐

Result: ☐ Competent (all critical steps = Yes) ☐ Re-coach needed **Follow-up date:** _____ **Observer signature:** _____

How to use: run at 30, 60 and 90 days after training. Feed results (with the course's xAPI data) into the Level 3 metric: ≥ 95% of technicians following all critical SOP steps within 90 days. Rising non-adherence → reinforce with drills, job aids and coaching.
